Customers Reference

500L/h Pure water RO

1000L/h Pure water RO

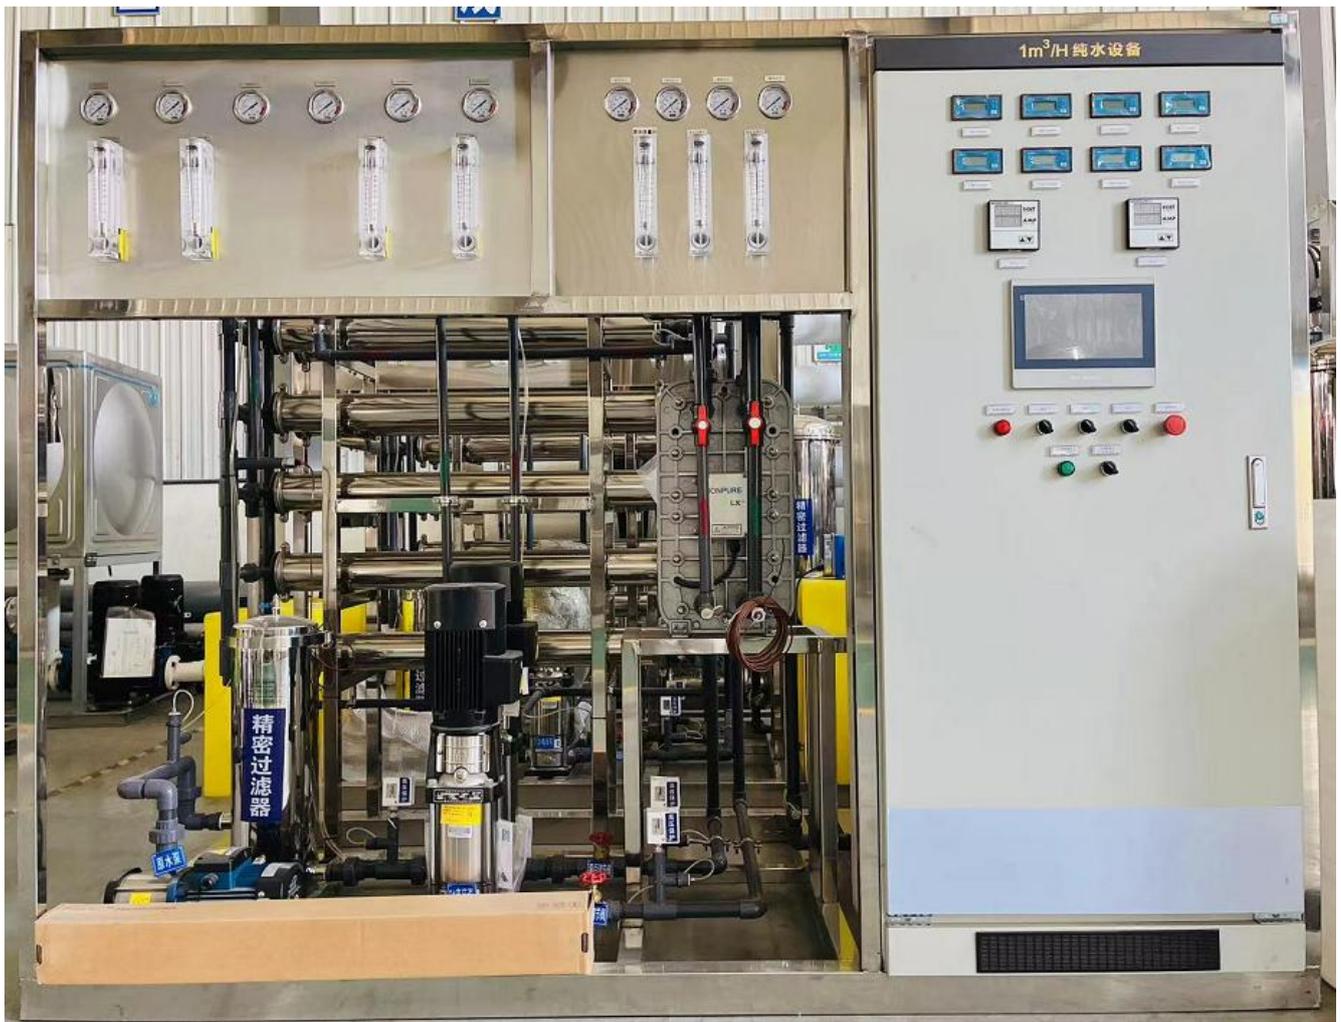

2T/h Pure water RO

RO+EDI Ultrapure water plant

Advantage:

1. Professional large multi-process comprehensive water treatment factory: Multimedia filter, Iron manganese and fluoride removal filter, quartz sand, activated carbon, softeners, precision filter, RO purify water; EDI ultra pure water, waste water treatment.
2. More than 20 R&D engineers and Diagram designers provide enough technology support, More than 50 after service engineers on site wait for your questions for 7x24 hours.
3. Provide scientific water treatment scheme, fast shipment and cost-effective product.
- 4.2 Stage RO+EDI+Polish bed+UV for 18MΩ ultra pure water requirement.
4. Provide production visualization service and support remote warranty.

*Sweeter and healthier water
Purifier and more nutritious
Integrated design
Auto PLC mode, Easy operate
High efficiency filtration
Stable and durable plant
7x24hours engineer service*

Project in Dubai

Dubai Seawater Desalination Project (1000T/d)

1. Overall customer needs

The customer's source water is seawater. In this project, seawater is desalinated and used for watering flowers and plants on the private island of King Dubai, while paying attention to high salinity seawater and chemical pollution of the environment. Processing capacity: $2 \times 1000 \text{m}^3/\text{d}$.

2. Main technology

Dior engineers have used the breakthrough vertical membrane arrangement technology in the testing of seawater and tap water quality in the region after the previous investigation on customer needs, which is convenient to reduce the floor space and the amount of membrane used, and expand the water production. The use of non-chemical pre-treatment technology not only reduces the impact on the environment. And ensure the normal operation of the equipment and the stability of the effluent quality.

About us

Di` Ao Water Treatment was established in 2010 with a registered capital of 50.06 million yuan. It is a large-scale modern enterprise integrating water treatment technology research and development, engineering design, equipment production, installation and construction. The company strictly follows the national quality management system standards. With high efficiency and environmental protection as the mission, we continue to carry out technological innovation, improve the technological content of products, and successfully develop a series of water treatment products with international standards.

The company's products are widely used in construction, environmental protection, water supply and drainage, HVAC, petroleum, chemical industry, metallurgy, papermaking, electric power and other industries. , Xianyang International Airport, etc. to provide complete sets of water treatment equipment and control equipment.

PRODUCT CERTIFICATION

Shaanxi Di'ao Environmental Protection Group Co., Ltd.

RO/EDI/UF/Sewage plant general Questions:

1) Who installs the machine?

We will install main part together you only need connect your electrical and water pipe is enough. We have all manuals and videos for you operating and adjusting. We have more than 50 engineers for after sales services 7*24 hours. And our engineers will make mob videos to guide anytime.

2) What is the useful life of the machine?

If the machine is maintained very well then it can be used for more than 20 years, here our old customer already used 18 years, but you need change filter material in every 3 years and replace new RO membrane in every 5 years, precision filter elements will be replaced in 3-12 months which is according to your actual use status.

3) Are your spare parts easy to find on the market? Or bring them with the machine?

We think spare parts are easy to find on the market since they are standard and common material. Filter material and RO membrane will be replaced after 3-5 years so need not provide it now. Precision filter element we already includes spare parts 150pcs with machine ship together you can use it for 3 years.

4) Does this machine have a warranty? We need to know everything.

Generally warranty is one year after you receive the machine, we have special engineer to follow your machine, and our engineer will serve it for no time limit that is only if it's our factory products, our engineers have responsibilities and obligations to help you solve all problems with 7x24 hours. We are a professional and comprehensive large-scale factory, we must ensure that the machine can run properly and meet the customer's expectations.

5) This is just a sample, we have many customers waiting to see it working to place their orders.

Noted with thanks, we are confident our machines have good performance since other customers already received and used for many years and now still using and enjoying sweeter and purifier water.

6) Most important is the plant must have high quality product and very on time engineer after Service go guide customer people to operate and adjust it to work very smoothly. Maybe you do it hard but professional engineers makes it quickly and easily. We are here wait for you anytime.

Thank You
